Abstract: This article shows importance of reading and advantages of being a good reader as well as it gives information about how to help to our students who are not good at reading in increasing their abilities for being proficient readers. Main 3 effective strategies to enhance students' cognitive abilities which are reading with expression, schema structure and teaching students for how to read a text are clarified.

Key words: verbal, non-verbal, language skills, reading skills, learning styles, intonation, emphasis, schema structure, background, reading with expression, skimming, scanning, previewing, analyse and interpret materials.

Reading is important because it helps us gain knowledge, improve cognitive abilities, and enhance language skills. It also fosters empathy, reduces stress, and improves communication skills as Dr. Seuss said, "The more that you read, the more things you will know. The more that you learn, the more places you'll go." However, not all students have good reading skills.

Teachers must pay attention for students' unique learning styles. Learning styles can be visual, auditory and tactile. However, cognitive methods can be verbal or non-verbal and sequential or global. These different learning styles are important to teachers in deciding how to teach each student effectively and efficiently.

If we want our students to become better readers, we need to use some reading strategies when teaching our students to read quickly and effectively.

There are many different strategies to help our students become great readers. First of them is reading with expression. It is important for stimulating students to read more quickly and effectively because it captures their attention and makes the material more engaging. It helps students understand the tone and mood of the text, making it easier for them to connect with the material. Reading with expression also encourages students to use intonation and emphasis, which improves their communication skills. It fosters empathy by allowing students to connect with the characters and their emotions, making the reading experience more immersive. Additionally, reading with expression can reduce stress and promote relaxation, creating a positive association with reading.

Secondly, Schema structure is important also because it helps them quickly make connections between their prior knowledge and the new information they are reading. When students have a strong schema, they can comprehend and process new information more efficiently. It allows students to anticipate what will come next in the text, which can help them read more . Having a well-developed schema also helps students to better understand the context and background of the material they are reading, leading to improved comprehension and retention. It encourages students to actively engage with the text and make predictions, which can enhance their reading speed and effectiveness. Schema structure promotes critical thinking skills, as students are able to analyze and interpret the text more easily. Therefore a strong schema structure is essential for stimulating students to read more quickly and effectively, leading to improved overall reading performance.

Thirdly, Teaching students how to read a text effectively is crucial. By providing them with strategies such as skimming, scanning, and previewing, students can learn to identify key information and main ideas more readily. Additionally, teaching students how to make connections between their prior knowledge and the new information in the text can help them comprehend and process new information more efficiently. It also encourages them to actively engage with the text, make predictions, and analyze and interpret the material, leading to improved reading speed and effectiveness. By instilling these skills in students, they can become more confident and proficient readers, ultimately enhancing their overall reading performance. Ultimately, teaching students how to read a text effectively is essential for fostering a love of reading and promoting lifelong learning.

In conclusion, the importance of reading cannot be overstated, and it is essential to encourage students to read more quickly and effectively. In order to stimulate students to read more and increase their interest, it is important to teach them how to read a text. Additionally, schema structure and reading with expression can also help to stimulate students to read more quickly and effectively. By implementing these strategies, educators can help students develop a love for reading and harness the transformative power of books for personal growth and knowledge.
