

MODERN TECHNOLOGIES IN TEACHING FOREIGN LANGUAGES

Tuxtaboeva Gulrux Bobojon qizi

Student of the Faculty of Foreign Languages of the Nukus State

Pedagogical Institute named after Ajiniyaz

Annotation. This article dives into the upside of using modern tech heavily in language classes. Learning another language helps you understand multicultural societies, opens doors to new cultures, and sparks curiosity about the world. Educational technology offers extra benefits, like boosting students' mental and physical wellbeing. These tools empower students to improve their learning and cognitive skills, leading to better academic performance and potentially even physical health.

Key words. Modern technologies, teaching process, learning skills, interactive whiteboards, practice, success, traditional learning

The recent surge in technology has sparked discussions about its role in education. It's not just about fancy gadgets; it's about new teaching methods and a whole new way of learning. This paper focuses on how technology can be used effectively to improve foreign language instruction, particularly English as a Second Language (ESL).

Technology offers various tools and techniques that can significantly enhance ESL learning. With the rapid pace of technological advancement, overcoming challenges in education has become easier. The benefits of integrating technology into ESL are particularly clear. As technology becomes more prominent, students gain more freedom and support to learn effectively. Teachers can develop and teach language patterns to help prevent and repair breakdowns. The rise of online learning is a prime example, offering increased efficiency and affordability.

Technology and learning English are becoming increasingly intertwined. The global communication landscape has shifted dramatically. The internet now provides easy access to what was once out of reach. Technology fosters connection by creating a more interconnected world. Gone are the days of limited educational options. Technological advancements offer students the flexibility of online learning and access to a vast array of resources.

One might think online learning hinders social interaction, a crucial aspect of learning English. However, technology facilitates the creation of virtual communities. These online spaces allow students to discuss topics, seek help, and develop leadership skills by assisting others. Interactive whiteboards, for instance, are a valuable tool for learners to access resources or revisit important topics before moving on. They perfectly illustrate how technology can enhance online ESL education.

Another benefit of technology in ESL is increased student engagement. Traditional classroom settings often rely on rote memorization, which can be disengaging. Technology transforms learning by presenting content in various ways, making it easier for students to focus. Lessons that incorporate computer-based instruction, visual aids, and advanced materials allow students to learn more effectively.

Conclusion

In conclusion, technology is certainly not beneficial only for education of because just about everything has become more accessible nowadays. But especially for learning English, having technical assistance and more flexibility Is the key to success. Traditional learning in a classroom is extremely limited and can only be ongoing as long as students are present. However, technology and learning English has allowed students to use mobile phones or computers for example, to access require information anytime they need. This not only helps students to absorb the material but also offers valuable practice on the proper ways to use tools of technology. Computers are regarded as an important instructional instrument in language classes in which teachers have convenient access, are sufficiently prepared and have some freedom in the curriculum. Computer technology is regarded by a lot of teachers to be a significant part of providing a high - quality education. Teachers should encourage learners to find appropriate activities through using computer technology in order to be successful in language learning. The use of suitable technological materials can be useful for all types of learners.
