**Annotation:** This article endeavors to elucidate the pivotal role of information technology in English language instruction. It delves into diverse methodologies and strategies aimed at enhancing the competency of English language learners through technological means. These encompass online platforms dedicated to English language acquisition, computer-assisted language learning programs, presentation software, electronic lexicons, instant messaging and email platforms, audio devices such as CD players, and educational video clips.

**Key words:** language acquisition, academic opportunities, technological integration, online platforms, CALL programs, presentation software, instant messaging, audio devices, educational video clips, electronic lexicons.

Language acquisition stands as a cornerstone within human society, constituting a pivotal means of communication. Mastery of a language can be attained either organically, through immersion in natural settings such as familial and societal interactions, or through structured pedagogical frameworks, such as formal instructional settings. Theoretical inquiry delves into the intricacies of linguistic phenomena. In our era marked by burgeoning global interconnectivity, proficiency in languages, particularly multilingualism or polyglossia, assumes paramount significance.

The significance of integrating English language instruction into Uzbekistan's education system is burgeoning for several reasons:

1. **Globalization:** In light of the rapid globalization of commerce, technology, and cultural exchange, mastery of English has metamorphosed into a requisite for international discourse, commercial dealings, and collaborative ventures. As Uzbekistan endeavors to embed itself within the global economic landscape, the imperative for English language proficiency among its labor force burgeons.

2. **Diplomacy:** English has emerged as the lingua franca of diplomacy and international relations. As Uzbekistan forges expansive diplomatic alliances and intensifies its participation on the global platform, proficiency in English assumes a critical mantle for diplomats, governmental functionaries, and international emissaries.

3. **Academic opportunities:** Proficiency in English serves as a gateway to academic pursuits abroad. Numerous prestigious universities worldwide impart education in English, necessitating proficiency in the language as a prerequisite for admission. As Uzbekistan strives to enhance the caliber of its educational system and augment avenues for students to pursue overseas studies, the exigency of English language education becomes increasingly apparent.

4. **Tourism facilitation:** English fluency is indispensable for the tourism sector, facilitating seamless communication between tourists and local denizens. As Uzbekistan endeavors to amplify tourist influx and showcase its rich cultural heritage and historical landmarks, adeptness in English communication assumes paramount importance for individuals operating within the hospitality industry.

5. **Technological Integration:** English predominates as the language of the internet, scientific inquiry, and technological advancement. As Uzbekistan endeavors to synchronize with technological strides and incorporate digital tools and resources into its educational framework, proficiency in English emerges as a requisite for efficacious access and utilization of these resources.

6. **Cultural Engagement:** Mastery of English enables individuals to engage with a plethora of English-language literary works, music, cinematic productions, and cultural manifestations. As Uzbekistan aspires to nurture cultural interchanges and foster mutual understanding with the global community, proficiency in English empowers its citizens to engage more profoundly in these cross-cultural dialogues.

Collectively, the burgeoning emphasis on English language instruction within Uzbekistan's education system mirrors the nation's aspirations for economic advancement, international entrenchment, educational enrichment, and cultural reciprocity in an increasingly interconnected global milieu.

On February 13, the President of the Republic of Uzbekistan, Shavkat Mirziyoyev, convened a session to discuss the advancement of information technologies and the establishment of contemporary infrastructure to support this endeavor. It is noteworthy that this year has been designated as the "Year of Science, Enlightenment, and Advancement of the Digital Economy" in Uzbekistan.

In light of these rationales, it is discernible that information technology (IT) holds pivotal importance within this domain and occupies a central role. Herein, we shall delve into an examination and elucidation of the salient facets of IT, supplemented by illustrative examples.

The significance of information technology in English language instruction cannot be overstated. Information technology, in conjunction with the aforementioned solutions, enables educators and learners to render the learning experience convenient, efficacious, and engaging through the utilization of computers, the internet, software

applications, and online platforms. This affords students ample opportunities to excel in their educational endeavors.

Information technology fosters heightened interactivity among students in English language acquisition. Learners have the autonomy to engage in self-directed learning via online courses, interactive software, and mobile applications. For instance, online lexicons and grammatical resources serve as foundational references. Additionally, language-learning gamification, multimedia resources, and audiovisual tutorials facilitate immersive and enjoyable early-stage learning experiences for a broad spectrum of students.

Moreover, information technology streamlines the workflow for educators. They can establish swift and seamless communication channels with students through online repositories, digital course materials, and communication platforms. This enables educators to efficiently oversee student progress and administer the educational curriculum.

The amalgamation of these pivotal features renders English language instruction convenient, efficacious, and engaging for both educators and learners alike. Information technology optimizes the learning process, fostering efficiency and enabling educators and learners to embrace novel and innovative pedagogical methodologies collaboratively.

Certainly, here are specific information technology (IT) solutions that can be harnessed to facilitate the acquisition of English language skills, encompassing reading, listening, speaking, and writing:

1. **Online literary repositories:** Utilizing platforms such as electronic books, digital libraries, and online periodicals furnishes an extensive repertoire of English reading materials. Justification: These platforms afford a comprehensive selection of literary resources spanning diverse subjects and genres, accommodating varying interests and proficiency levels.

2. **Language acquisition applications:** Mobile applications including Duolingo, Rosetta Stone, and Babbel proffer interactive modules and exercises conducive to language acquisition. Justification: These applications furnish a convenient and engaging avenue for students to hone their reading, listening, speaking, and writing proficiencies, unrestricted by temporal or spatial constraints.

3. **Auditory resources:** Podcasts, audiobooks, and language learning podcasts present avenues for honing listening skills. Justification: Exposure to authentic English content enhances listening comprehension and acquaints learners with an array of accents and speech patterns.

4. **Voice recognition solutions:** Technologies such as Speechnotes, Google Speech-to-Text, and Dragon NaturallySpeaking facilitate the enhancement of speaking and pronunciation abilities. Justification: Real-time feedback provided by voice

recognition software aids students in refining pronunciation, intonation, and fluency, bolstering their oral proficiency in English.

5. **Virtual communication platforms:** Video conferencing tools like Zoom, Skype, and Google Meet enable real-time dialogues between students and educators. Justification: These platforms facilitate interactive speaking exercises, fostering communicative competence as learners engage in English discourse and receive feedback from peers and instructors.

6. **Writing assistance tools:** Word processing applications such as Microsoft Word, Google Docs, and Grammarly afford support in honing writing aptitude. Justification: These platforms offer spell check, grammar correction, and stylistic enhancement functionalities, facilitating the creation of polished written compositions in English.

7. **Interactive whiteboard systems:** Platforms like SMART Notebook and Promethean ActivInspire empower educators to craft dynamic lessons for imparting English grammar, vocabulary, and writing skills. Justification: Interactive whiteboards enhance classroom engagement and afford educators the means to deploy dynamic pedagogical approaches, fostering an interactive and efficacious learning environment for English language instruction.

In sum, the deployment of these technological resources equips both educators and learners with indispensable tools for the acquisition and refinement of English language competencies, catering to diverse learning modalities and preferences within the educational milieu.

A recent development on April 11, 2024, @mock\_milliy\_test\_bot can epitomize, marked the introduction of an artificial intelligence-powered bot designed to assess English language proficiency levels. This innovation emerged as part of a scholarly endeavor focused on theoretical conceptual frameworks and the assessment methodology for cultivating communicative competence among prospective English language educators.

This bot facilitates the evaluation of users' English proficiency across four essential language skills: listening, reading, writing, and speaking.

Until now, language learners had to participate in various offline mock exams to determine their level, and at the same time, they had to wait for weeks for the exam results, but now this problem is being put to an end remotely through just one bot. that the importance of IT is immeasurable highlights.

Furthermore, the bot offers users the opportunity to receive constructive feedback, insightful commentary, and guidance, in addition to conducting plagiarism checks on written submissions.
