Ключевые слова: современные технологии, иностранный язык, навыки чтения, письма, разговорной речи и аудирования.

After the independence of our country, the interest in teaching foreign languages has increased and many opportunities have been created for young people. As the first President Islam Karimov said, "At present, great importance is attached to the teaching of foreign languages in our country. This, of course, is not in vain. Today, there is no need to underestimate the importance of perfect knowledge of foreign languages for our countries, which are striving to take a worthy place in the world community, for our people, who are building their great future in cooperation with our foreign partners.

As a logical continuation of these ideas, the Presidential Decree of December 10, 2012 On measures to improve further the system of teaching foreign languages expanded the opportunities for learning foreign languages. In addition to this resolution, the resolution of the President of the Republic of Uzbekistan On measures to bring the promotion of foreign language learning in the Republic of Uzbekistan to a

qualitatively new level” 2021.[1] In accordance with the Resolution No. PQ-5117 of May 19, 2006, as well as for the effective implementation of organizational measures to promote the study of foreign languages, the Cabinet of Ministers decides: Teaching a foreign language in the Republic, knowledge of foreign language teachers and new methods and requirements for assessing skills have been developed in accordance with the Pan-European Framework Recommendations (CEFR). [2] The new pedagogical method has been introduced in all educational institutions across the country. According to him, textbooks have been created for students of secondary schools and vocational colleges. In accordance with these requirements, classrooms are equipped with stands and new information and communication technologies. The demand for learning a foreign language is growing day by day. Foreign language science is divided into four aspects (reading, listening comprehension and speaking), each of which provides specific concepts and skills. Educational technology is the effective use of modern information technology in the educational process. It also aims to improve the quality and effectiveness of education through the introduction of modern innovative technologies in the educational process. In particular, there are several advantages to using such information and communication technologies in learning a foreign language. The role of modern technology in language learning and teaching is invaluable. The use of technology is useful in every aspect of learning a foreign language (reading, listening and speaking). For example, to listen and understand, of course, it is impossible to do this process without a computer, player, CDs. Listening is one of the most important parts of language learning. This requires the student to pay attention to the speaker's pronunciation, grammatical rules, vocabulary, and meanings at the same time. The use of modern technologies in the educational process is also an important factor for students to be familiar with and use information and communication technologies. One of the most effective ways is to teach and learn a foreign language using modern technology.[3]

These processes include encourages students to organize new information in more foreign languages. In the modern equipped foreign language classrooms, the teacher increases the interest of the students through various games during the lesson. At the same time, the reader learns how to use both language and modern technology for useful purposes.

In short, in the 21st century, the age of modern technologies, the best way for every student is to use modern methods and techniques in the classroom in order to ensure effective and quality education of all students in a foreign language. Using modern technologist and methods during classes helps both teacher and student.
