Key words: individual characteristics, observational learning, listening learning, observational learning, receptive skills, information reception, innovation, technology, efficiency, specialization, information communication.

Introduction: Learning a foreign language is a complex process and some people are different from others it can be observed that they show significant results and learn faster is the truth. Most linguists and language teachers are always individuals are interested in the causes and factors of the differences between and why they are. There is a lot of difference between people learning a second language and learning a foreign language they are surprised. Thus, in the last few decades, the language A number of people working in the field of teaching have analyzed the different results and their effectiveness of students in acquiring and learning a foreign language. to do, describe individual characteristics and their keys to success they spent a lot of effort. Regarding the application of these theories in practice many linguists can form foreign language learning trajectories language learning strategies and methods, the individual of the person they emphasize the important role of their characteristics.

The main part: Television, including children and teenagers through local TV channels preparation of programs on teaching foreign languages and their broadcasting history and culture of other nations, world science and technology scientific popular, foreign artistic and multi-part films to carry out regular showings with the help of Uzbek subtitles; International education and knowledge acquisition of educational institutions through the "ZiyoNet" network significantly increase access to resources, its resource center with multimedia resources, applications for personal computers and mobile devices enrichment, as well as educational and fiction literature in English, specialized printing of newspapers and magazines decorated with pictures, special columns for them and the organization of applications ”, at the moment all English teachers to liven up their lessons began to feel the need to use technology.

Nowadays, the importance of learning English in Uzbekistan is more important than before is becoming much higher. A number of English language experts are

English are applying new methods and ways of learning the language to life. Of course it is increases the effectiveness of teaching foreign languages. Using technologies, teaching has several unique advantages. In addition, it is teaching greatly increases the efficiency of the system and, in turn, the student learning the language They keep up with the times and help to move forward. Technology is slow is slowly taking the place of traditional education. Television today a new program that helps to teach English in several programs and programs are being broadcast regularly. It is worth noting that it is necessary to improve the effectiveness of teaching in Uzbekistan today new methods of using new modern innovative technologies was introduced. For example, a student who is being taught a foreign language on the basis of multimedia development of four skills, both by seeing and hearing through interesting materials there was an opportunity to learn. In addition, the student sees live actions can guess the meaning of some words and tries to understand it.

Overall findings indicate that observed student kinesthetic learning is a modest visual learner who embodies the characteristics. It is learning finds visual objects more useful in the process and in performing tasks can be beneficial. Individual learning differences theory and classroom learning styles offers three types of styles: visual, auditory, kinesthetic or tactile and the research conducted on the language learner and the possibility of using it in practice will give. Results of the case study topic in the perspective of learning styles in the classroom is another thing that shows the characteristics of a person in practice. Research shows that the student's preferred learning style is visual learning and its integration with others is mainly kinesthetic. This style Several studies support the theory and its benefits There are strategies and methods. I think it was useful to the reader there are many suggestions to help you use it. First, it's confusing organization of work and study space to avoid factors, cleanly organized or using typing materials is good for being more efficient can be helpful. Before answering written and other tasks, developing pictorial or written outlines of answers will help this student and his/her colleagues to organize information and visually encode and remember encourage the use of test preparation strategies that emphasize possible In short, the benefits of learning style to students know and use it and adapt it to their needs and possible if possible, combine different styles to make their learning more effective can be recommended. Because every person is different, learning and it is important to know their individual differences in teaching.

CONCLUSION. It follows that enriching our lessons, students the role of modern technologies in enriching their knowledge is incomparable. Being able to use them correctly and appropriately is the main guarantee of our success is considered.
