

CORPUS LINGUISTICS

Xotamova Lobar Shukrillayevna
English teacher of Bukhara Institute of Engineering
and Technology Academic Lyceum

Annotation: The attention paid to the Uzbek language in our country today is enormous. This puts another important task for our linguists, which is to create a corpus linguistics of the Uzbek language. This database, which is available in all languages of the world today, such as Russian, English, Spanish, and Arabic, is a key issue that we expect to have in our linguistics as well.

Keywords: Uzbek linguistics, corpus linguistics, dialectology, quantitative and qualitative analysis.

Every people and nation must protect, preserve and develop their native language tries to introduce him to the world. Including the development of our mother tongue since our independence was gained, a lot of work has been done by our linguists in different areas and directions of the Uzbek language many scientific works were done. In recent years, attention has been paid to our language grew even more. With the initiatives of our honorable president, celebrate October 21 every year celebration as a holiday, development of the Uzbek language

The establishment of the state department is a clear proof of our above statements takes.

Nowadays, the Uzbek language needs to be developed, preserved and passed on to the next generation use of information technology tools in communication, our language modeling, transfer to an electronic system is one of the main, topical topics.

Corpus Linguistics - the "real life" stored in the English language (or corpus) is the study of language on the basis of broad sets of language uses - for linguistics created computerized databases. Also to the body also known as based studies.

Today, the branch of linguistics dealing with such works is corpus linguistics, which is considered a direction of modern linguistics.

The practical importance of corpus linguistics is great. Computer equipment the possibilities are wide. In this sense, corpus linguistics is a computer tool researches, learns and develops the language with the help of it.

Unfortunately, this field is currently well developed in developing countries

Bakhtiyor Mengliyev, a linguist in Uzbek linguistics in other words, the first steps have been taken. The Uzbek language is extremely rich and the possibilities are wide. The variety, attractiveness of the lexical layer, unique expressions, similes, metaphors and syntactic figures are widely used in artistic works described. If all these are researched, the national corpus of the Uzbek language if it is created, if it is transferred to the computer system and electronic zed, it is done in our linguistics it would be a great achievement.

Advanced corpus linguistics covers all areas of linguistics can get As an example, let's take the field of dialectology. In this field the role of computer linguistics is incomparable. Dialects are our priceless treasure collected and systematized based on

the requirements of the national corps, it is indelibly sealed would be What is the name of each dialect in which region, which word in the literary language very convenient introduction to equality etc. through one command operation allows.

Corpus linguistics is conducted in different areas of linguistics it is also very convenient for scientific research. Especially teachers in secondary schools are a wide opportunity to use for educational purposes.

Corpus linguistics methodology in classroom context students of all levels

It is very suitable for, because it requires very little knowledge to learn the language learning a demanding language.

Quantitative and qualitative analyses

"Quantitative techniques are essential for corpus-based research.

Quantitative and qualitative methods are widely used in corpus linguistics, as well as starting with the quantitative findings of corpus linguistics and doing qualitative work is unique to But there may be methodological elements to this process.

For example, why certain frequency patterns occur an attempt to explain, for example, a qualitative analysis (the investigator's languages using the ability to interpret samples) qualitatively qualitative investigations transfer is appropriate. Examples in a particular corpus are defined by them a classification tool according to the requirements, and this classification, later, in broader terms (or principles) will lay the groundwork for another quantitative analysis.

It is known that the word is the main tool of artistic image, image creation, it is considered one of the important factors of individualization. Without words, expressiveness objective existence without the participation of phonetic, morphological, syntactic means of expression.

It is impossible to accurately describe objects and events. Little by little words such lexical-semantic groups and different ways of meaning transfer created. As a result, the artistic level of the work has increased and it is artistic in its own right

It has been preserved for generations.
