and Technology Academic Lyceum*

Abstract: At present, care over state languages (means Uzbek language). in our country is growing. Therefore, the need for teachers to use new methods, advanced pedagogical and innovative technologies in teaching the subject of mother tongue in order to teach in secondary schools is becoming a modern requirement. It is with this goal in mind that we have dedicated the article to new interpretations of lessons in secondary school mother tongue classes.

Keywords: pronunciation, speaking skills, modern technical means, management methods, language meanings.

Law of the Republic of Uzbekistan "On Education" and "Personnel the national training program" is related to pedagogues, scientists and the educational system

Education is one of the huge and responsible tasks that all specialists have before them organization of the process on the basis of advanced modern pedagogical technologies. That's it is not for nothing that special attention is paid to students' language acquisition, of course. After all, today's successful operation in modern conditions for every young person to have mastered several languages, from the Uzbek (state) language

In addition, it is required to be fluent in at least four world languages, not two.

Teachers for effective organization of mother tongue classes in schools they should pay attention to the following aspects:

1. Organizing the lesson in groups of 8-12, 15-20 people.
2. Modern technical tools (video-recorder, computer and use of other audiovisual equipment).
3. In language teaching, as well as subject textbooks, study guides, methodological independent of manuals, methodological guidelines and developments use.

Teachers for effective organization of mother tongue classes in schools they should pay attention to the following aspects:

1. Organizing the lesson in groups of 8-12, 15-20 people.
2. Modern technical tools (video-recorder, computer and use of other audiovisual equipment).

3. In language teaching, as well as subject textbooks, study guides, methodological independent of manuals, methodological guidelines and developments use

4. To learn the language theoretically in the organization of training sessions, focus on developing new speaking skills.

In addition, the skill of correct pronunciation in teaching the mother tongue it is important to regularly increase the formation and vocabulary have It is good to use technical means - video and audio recorders it works.

Practice plays an important role in applied sciences. Mother tongue science is also practical belongs to the sciences. Any practical conclusions should be convincing, highly scientific level, that is, it should be thorough and reasonable. Scientific methodology recommendations level, theoretical verification of verification methods at a high level also depends on the accuracy.

There are 2 types of verification methods:

1. Theoretical verification methods.

2. Empirical method (method based on experience). This method has the following purposes applies to:

a) This method is to study the work experience of teachers, to select innovations, generalization, assessment and popularization, teacher and student activities determine the level;

b) Appropriate monitoring of the process of teaching students (the lesson, its check some part, students' answer, story, written work), teacher and checking students' activities through a questionnaire;

Especially in the mother tongue classes of secondary schools, language meanings (lexical, teaching the principles of understanding (grammatical, morphemic, syntactic meanings). it is necessary to create a new interpretation. A word, a morpheme, a phrase, a sentence understanding is determining the connection between certain events in existence means The condition of following the principle of understanding the meanings of the language is the whole of the language aspects, all language subjects (grammar, vocabulary, phonetics, orthography, methodology) is considered to be taught in an interconnected manner.

For example, morphology can be taught and mastered only by relying on syntax. Syntax while learning relies on morphology, orthography on phonetics, and grammar on words relies on being made and so on. Morphemic analysis of the word and its meaning helps to understand. All aspects of language are interrelated connected, and it must be taken into account in teaching

In short, a specialist teacher who teaches the subject of the mother tongue pay great attention to teaching classes based on new pedagogical technologies must

Effective organization of mother tongue classes in schools is the future development of our language is also important for.
