**Annatation:** This article provides an overview of the achievements and opportunities in the Finnish education system for the introduction of differentiated education.

**Key words:** Education, educational process, educational system innovative education, education practice, identity, partnership in education, equality in education. The Finnish education system is one of the most effective in the modern world and ensuring its high level of the country's national strategy means priority. International Student Assessment by program data (Programme for International Student Assessment, PISA)28 Finnish education has been one of the leading places in the world ranking for several years took over. In this process, not only the level of knowledge, but also the growth of each student the availability of conditions for.

Education in Finland is a person-centered approach and all participants a process aimed at creating an environment that is equally comfortable. As mentioned above. For the reasons mentioned above, studying Finnish education is a positive aspect of this country the goal of transferring his experience to local education in the context of its modernization very important.

Characteristics of education in Finland and its success a number of methods were used in the study of determinants. These methods a research problem that includes a theoretical analysis of normative legal documents, scientific publications, synthesis, comparison, summary were obtained data. In addition, in the formation of basic rules and conclusions. The authors rely on observational data and their own experience collected over two years relied on.

Educational internship to Finland in May 2019 and January 2020. Research and results

Currently, the following criteria are used for quality assessment:

1. demand for education, availability of education, contingent movement,

2. the structure and operation of the entire educational system and its components,
3. the relationship between the quality of education and its availability,
4. development trend and changes in education policy and education,
5. mutual relations education and society,
6. programs and training programs,
7. educational achievements,
8. current emphasis in assessment.

Thus, Finnish education is evaluated according to the listed criteria. E. E. Sin by the Ministry of Education and Culture of Finland, its availability, the same quality and content everywhere and for everyone in modern reality states that it is a policy guide. This is the priority stage of education preschool stage. Pre-school education is compulsory and free. Make it happen provided with a specially designed curriculum. Preschool education the goal is preparation for further studies at school. The duration of school education in Finland is twelve years. It has three structures includes the main stage.

1. Structure of education in Finland (compiled by authors) after 9th grade students make a choice in favor of vocational education, or to enter a higher educational institution 10-12 grades are being prepared in polytechnic institutes of higher education (universities) or classical universities.

2. Specific features of Finnish education by the authors Created. As for the practical direction of education, one of them is to bring students to lifepreparation is a priority. Therefore, the lessons are practical skills aimed at formation. In the country, it is directly emphasized that education not for exam preparation, but for the learning process.

Thus, Finnish education is not for school, but for life based on the principle Many people oppose this position, and to some extent, it is knows that it has a negative effect on the educational process. However, the main goal observed from this is each is to provide education for man.

As a general conclusion, we note that education in Finland following a number of specific characteristics and factors for success will help. First of all, education is a national priority and the main task of the country one of the values. Here, the social welfare of society and the quality of education are mutual the connection is clearly observed. State education policy to every citizen of the country provides free education. Equality in Finnish education, of the individual creation of conditions for the proper development, respect, the educational process and the teacher attitude, high material support, the first in the world prestigious ranking takes places.
