**Abstract:** In our article on the topic of innovative methods of teaching foreign languages in primary grades, we provide scientific justification for the importance of introducing students to interesting and effective methods of learning foreign languages. The article highlights innovative methods of teaching foreign languages and shows how to increase interest in them, facilitate and organize learning through various games. The article collects popular science and practical news about these innovative methods and provides scientific justification for the benefits of their use in the classroom.

**Key words:** Innovative methods, primary classes, teaching foreign languages, innovations in teaching, interesting learning, innovations in the classroom, benefits of interesting learning, news, interest.

**Аннотация:** В нашей статье на тему инновационных методов преподавания иностранных языков в начальных классах мы приводим научные обоснования важности ознакомления учащихся с интересными и эффективными методами изучения иностранных языков. В статье освещаются инновационные методы обучения иностранным языкам и показано, как повысить интерес к ним, облегчить и организовать обучение с помощью различных игр. В статье собраны научно-популярные и практические новости об этих инновационных методах и дано научное обоснование преимуществ их использования в классе.

**Ключевые слова:** Инновационные методы, начальные классы, преподавание иностранных языков, инновации в обучении, интересное обучение, инновации в классах, преимущества интересного обучения, новости, интерес.

### Introduction.

Learning foreign languages can be difficult for students, but thanks to innovative methods, the challenge can be made easy and fun. Innovations in Teaching highlights the interesting and effective ways teachers should create when teaching foreign languages. This article discusses the importance of studying and applying innovative methods of teaching foreign languages to primary school students.

First of all, this article provides a general definition of innovative methods and how they should be used in primary schools. Next, we explain each innovative method

and highlight how it can be applied to them. Each method is shown in detail throughout the article, highlighting the benefits of teaching students foreign languages in a fun and effective way.

Teaching foreign languages in primary school is an honorable task for teachers. From this article they will be able to learn innovative methods of learning foreign languages, arouse students' interest in foreign languages and make their learning easier and more playful. Students learn about foreign language teaching and think about how to develop them.

The article provides additional information on the importance of using these innovative methods for elementary school students, as well as convenient and effective tips for teachers and students.

### **Main part.**

Teaching foreign languages in primary school can have a number of problems and disadvantages. There are a number of innovative ways to increase students' interest in learning new languages, motivate them to learn, and make the learning process easier. This article highlights innovative methods of teaching foreign languages to primary school students.

#### **1. Learning through games:**

To increase students' interest in learning foreign languages, it is appropriate to use toy teaching methods. This method uses interactive games, games and interesting situations to make the learning process playful for students and increase ease of learning.

#### **2. Creative activity:**

One of the innovative ways of teaching foreign languages is teaching students the language through creative activities. This method ensures that students are engaged in thinking about learning, being creative, and reflecting on the learning process.

#### **3. Interactive technologies:**

In lower grades, interactive technologies are used to make learning foreign languages easier and more interesting for students. Audio, video, and interactive learning materials allow students to engage in learning a specific language.

#### **4. Education through compliance:**

Articles, films, new ideas and educational support materials are used to increase students' motivation in learning a foreign language.

#### **5. Connectivism principles:**

This method encourages students to use specific platforms, creative communities and online resources to facilitate learning and mastery of a foreign language.

Innovative methods of teaching foreign languages to primary school students can be an ideal tool that will make students more interesting, facilitate learning and increase

learning motivation. These innovative methods help make learning effective and fun for both teachers and students.

Learning foreign languages should be an important and effective process for primary school students. It is important to use innovative methods of teaching foreign languages, to provide for the following problems and their scientific solutions:

**Problem 1: Increase student motivation**

It is important to motivate students to learn foreign languages. This challenge helps create a desire to learn in students and facilitates the learning process. To increase students' interest in learning foreign languages, it is important to motivate them by getting to know the country, culture and foreign language environment.

**Problem 2: Teaching innovation and innovative methods**

Innovative teaching methods help make learning foreign languages more interesting and easier for students. Virtual textbooks, interactive games, creative activities and online resources allow students to make the process of learning foreign languages playful and interesting.

**Problem 3: Toy education and creative activities**

It is important to involve students in learning a foreign language through playful learning and creative activities. This increases students' motivation to learn through play and gamifies the learning process. Educational toys and creative activities help make learning easy and fun for students.

**Problem 4: Interactive technologies**

Interactive technologies serve as an effective tool to facilitate student participation and learning in foreign language learning. Audio, video and online technologies allow students to learn foreign languages in a fun and interactive way.

**Scientific solutions:**

Explore new research and methods on the topic of foreign languages in learning.

Using scientific articles and books to make foreign language learning more interesting for students.

Teaching innovation and innovative teaching methods with scientific research.

To study and present effective methods of learning foreign languages among teachers and students from scientific aspects.

**Conclusions and suggestions.**

Teaching foreign languages is not easy for elementary school students. This process is important for increasing student motivation and making learning more interesting. Innovative methods can help solve this problem. These methods help students play in the learning process, work with interactive technologies, learn through creative activities, and bring students closer to the culture and country of foreign languages.

Offers:

**Playful learning and creative activities:** Teachers use playful learning and creative activities to make students' learning more playful. This is an effective way to make the learning process playful and interesting for students.

**Interactive technologies:** Using audio, video and online technologies in teaching is an interesting and effective way for students to participate in learning a foreign language.

**Increased motivation.** Teachers use motivational tools to help students want to learn. It is necessary to increase students' interest in culture, music, cinema and other cultural heritage of foreign languages.

**Principles of connectivism in education:** The Internet and creative communities in education can be useful for students' learning. The use of these resources in the process of learning foreign languages helps to improve students' thinking about learning and motivation to learn.

**Scientific solutions:** It is important for teachers and students to use scientific resources to study and research new methods of learning a foreign language. New research and articles will help you explore new and innovative teaching methods.

**Innovative methods of learning a foreign language** provide students with effective ways to make learning fun and playful. For teachers and students, these innovative methods can be useful tools to facilitate learning and increase students' interest in learning foreign languages.
