**Abstract**

Bu maqola orqali hozirda ingliz tilini bolalarga o`rgatishning zamonaviy usullari va asosiy aspektlari haqida gap boradi. Bundan tashqari ko`pgina esda qolarli va qiziqarli mashg`ulotlar haqida batafsil ma`lumot beriladi.

**Abstract**

This article talks about modern methods and main aspects of teaching English to children. In addition, many memorable and interesting activities are given detailed information.

**Key words:** kids, games, pictures, words, movies, cartoons, interests, method, funny activities, memorable, English books.

Nowadays, current modern language is English, it is recommended to teach children English from a young age. Because children's attrition is high in their youth. It is necessary to be gentle with children because children are the owners of our future and any small mistake made in their upbringing in their youth will play a big role in their future. The main purpose of teaching English to children is to ensure that they will be the necessary personnel for the future of our country when they become specialists in the field. You may be wondering how, but I can tell you that there are professors who have the knowledge and the ability to explain it to you in any area of English. As an example of these fields.

In order to teach children, scientists recommended teaching them with games, cartoons and other activities. They should be interested in science from now on, without leaving them bored. In order to teach English to children perfectly, it is necessary to teach them to behave freely in class and to talk to them in a friendly tone and treat them politely like friends. In this regard, obviously that we can apply many methods.

- Animal picture
- Colorful cards
- Funny activities
- Group games
- Movies and Cartoons
- Dancing to music

As a matter of fact that, every teacher has own method and methods of interest, and I think that the teacher`s should definitely add one of the above interesting methods to own work concept as a result with the help of these ways, teacher will achieve kids` interested and smile. Moreover, the most important thing is the children`s interest, however it is not easy and obviously it is done with many difficulties. I believe that the children's interest in science and their desire to learn will increase with the help of the above activities.

As a result of these activities, they do not necessary to have all these in one instructor, but some very necessary ones should be taught, even though all these exercises are very necessary and useful. If we take the firstly this is a **pictures of animals**. For example, in a book or on cards, it is interesting for the child, and the student is interested in what this object is and how it is called in a foreign language. During the game, the learner will remember and add knowledge to knowledge. Secondly, **funny activities and group games** are very effective for every kids which could not understand the topic or do not want to study because of these activities are really interesting. There are many ways to teach children but one of the most exciting and rewarding ways to do it is by using games. Games not only engage the children, but also teach through play – and most of the time the children don`t even know they are learning until the time comes to show their knowledge! It truly is possible to create a classroom where the students not only learn but also truly enjoy their time there. Through this, everyone gets active, both passive and active pupils, and as a result, all children get the same education, that is, nobody is left out. Moreover, **watching movies or cartoons** the main aspects for teacher because of these activities are one of the most interesting for both the teacher and the child, because it is equally enjoyable for everyone to watch. Lastly, learning verbs while **dancing** the most effective and funny activity. For instance, dance, jump, walk, touch, move, hold, and others. It's a great and wonderful feeling when a child comes and the teacher says, "I wish you had more lessons` isn't it wonderful?"

All in all, in order to teach children English easily, it is necessary to teach them together with where they will be in practical life, that is, for example, to go on trips with children on the topics being taught, or in situations where this is not possible, to enlighten them through dances, films for children, cartoons, and various games. For example, in the autumn season, when children are taught about colors, they are taken out to the school garden and asked about their colors in English by showing them the leaves of trees, the sky, the sun, and horses. There is a desire for science.
