

ECONOMIC GROWTH AND DEVELOPMENT FACTORS IN UZBEKISTAN

Zaripov Ezojjan Dilshodovich

Bukhara innovations university, economy direction master,

Abstract. Today in the world in countries of the state potential shows giving main from the indicators one this his economic growth indicators are considered Economic growth and economic development to each other similar to be with together, different there are also talents. This in the article in Uzbekistan economic growth and development factors about the author opinions, analysis given.

Key words: economic growth, economic development, economic growth quality.

Each state and his economic of activity main purpose population marriage well-being improve and the next one in place economic in terms of strong to be is considered of the world almost all in the state's economic activity for economic growth indicator yearly respectively account book by doing will go But, many cases his efficiency evaluation second in place will be for this reason economic growth and development between the difference the following table based on to see can.

Table 1

Economical growth and economic your development comparison table [1]

| | Economic growth | Economic development |
|--------------|--|---|
| Meaning | Economical growth in the country real work release and services the number increase mean holds | Economic development mean holds income, savings and investments with together of the country social economic in the field changes in the progressive structure (institutional and technological changes). |
| Factors | Economic gross internal product from the parts in one slowly slowly to grow depends on: consumption, government expenses, investment and pure export. | Development a person capital to increase inequality indicators to decrease and population his life structural to improve to changes depends. |
| Measurements | Economical growth quantitative factors such as real gross internal of the product growth or man per head right coming of income increase with is measured. | Economic development HDI (Human Development Index), gender compatibility index, Man poverty index (HPI), of infant's death literacy level such as quality from the indicators is used. |
| Impact | Economic growth to the economy quantitative growth take will come. | Economic development of the economy too qualitatively in terms of too quantitative in terms of to change take will come. |

| | | |
|-------------------|--|--|
| Communi cation | Economical grow national and person right to the head coming income growth reflection makes | Economic development while in the country life of quality tumor reflection makes |
|-------------------|--|--|

Economical grow determination and based on to give during to the following importance to give need to give need:

- 1) Economical to grow assessment;
- 2) Growth factors;
- 3) Economic growth models.

To these additional economically growth one how many to factors depends on:

- Natural resources volume and quality;
- Labor resources volume and quality;
- Main capital size;
- Technologies and innovations;

The last in the Republic of Uzbekistan in years above to factors big attention is being directed. An example for, in 2022 in the country the end according to gross internal product volume about 888.4 trillion sums organize did [5]. From this the highest contribution added network being services and industry is considered

Economy in our country development and Uzbekistan in the republic demand and offer, work with employment and unemployment and the like in matters balance storage for PF-60 of our president " For 2022-2026 intended for New Uzbekistan Progress Strategy decree acceptance done. This the III direction of the decree " National the economy fast development and high growth pace "providing". and the following goals own into received [2].

➤ Economy in networks stable high grow pace provide through upcoming five in population soul per head gross internal the product — 1.6 times and by 2030 population soul per head right coming 4 thousand income USA from the dollar increase and income from the average high has been states” access for the ground Create.

➤ National economy stability provides and gross internal in the product industry share to increase directed industry policy continue industry products work release 1.4 times the volume increase;

➤ The economy electricity energy with continuously provide and " Green economy " technologies all to areas active current of the economy energy efficiency to 20 percent increase;

➤ In the country investment environment, more improve and his attractiveness increase, future five 120 billion US per year dollars, including 70 billion foreign dollars investments attraction reach measures to see;

➤ In economics financial resources increase in order to upcoming 5 in stock market circulation 200 million USA from the dollar 7 billion USA to the dollar deliver;

➤ of the Republic export potential increase Republic in 2026 through export volumes of 30 billion US to the dollar deliver;

➤ Water resources manage system fundamentally reform to do and the water economy to do according to separately state program done increase;

➤ Areas proportionate development through territorial the economy 1.4 — 1.6

to the bar increase;

➤ of territories engineering and communication and social infrastructure system and service to show and service fields development.

Summary by doing in other words stable economic grow all of states main purpose is considered That's why for economic growth done increase for in society all, education, health storage, sports, economy, international communications, tax system and that's its similar field and networks one in totality reform to do necessary will be done.
