

**EDUCATION OF YOUNG PEOPLE IN THE SPIRIT  
OF MILITARY PATRIOTISM**

*Ulug Tilloyev Umarovich*

*Is a teacher of the Faculty of Military Education  
of the Bukhara State Pedagogical Institute*

**Abstract:** The Republic of Uzbekistan undertakes the tasks of ensuring the safety, peace and stability of citizens while conducting peace policy. According to the Charter of the United Nations, it implements the inviolable right to defense, and provides military and defense power of the state at the level of intellectual sufficiency.

**Key words:** Republic of Uzbekistan, Armed Forces, youth, patriotism, citizenship, civil protection.

Training young people to serve in the Armed Forces of the Republic of Uzbekistan is a state-level task. In order to solve this task, primary training before the call-up, including civil defense training, is a compulsory subject in the curriculum, in general educational institutions, secondary special and secondary vocational education. It is stipulated in Article 13 of the Law of the Republic of Uzbekistan "On General Military Obligation and Military Service" that it should be carried out by teachers of primary training in institutions before the draft, starting from the courses or classes on the eve of the graduation year. Taking into account the importance of this issue, the direction "Military education up to the draft" in higher education institutions, that is, "Military education", which is considered one of the main subjects in the training of future "Primary training before the draft" teachers "patriotic education" is included.

Young people are the future of our country and nation. As we entrust the fate of our country to them, first of all they should fully understand the complex and responsible task assigned to them, and contribute to it. After all, love for the Motherland and love for it are directly determined by the creative work that everyone does for the development of this country. In the development of national identity awareness, education of deep-thinking young people imbued with national patriotic ideas is of great importance. Therefore, each of our young people who are preparing for the defense of the Motherland must be educated in the spirit of high patriotism. Patriotism is a high human virtue. Patriotism is one of the brightest aspects of perfection. That's why it is recommended in Hadith Sharif that "loving one's country is a matter of faith." However, it should be emphasized that today's generations of the people who made a great contribution to world civilization in the past, their heritage is recognized by the peoples of the world, because such feelings in them are national pride and spiritual it leads to perfection, strengthens the desire to understand the

national identity. Military patriotism training will give good results only if it is carried out in a way that is organically connected with physical training. That is why military patriotism cannot be imagined without physical education. Resistance to cold and heat, not succumbing to diseases easily, overcoming difficulties, willpower. The role of physical education and sports in the development of students, young people and teachers in the development of qualities characteristic of a defender of the Motherland, such as perseverance, ability to move quickly and quickly, is extremely important. In fact, true loyalty to the Motherland requires the ability to defend it. . Education of students in the spirit of military patriotism should be the main focus of all types of educational institutions. When it comes to national patriotism, it is the faith, honesty, love, consequence, passion, honor, loyalty to the motherland, to one's people, moral and spiritual values, ideas, views that are ingrained in the blood of the Uzbek people. The sum of them is understood. The formation of the sense of patriotism in educational institutions is the main content of education. [5] In the formation of patriotic feelings, the national symbols of Uzbekistan are the flag, coat of arms, anthem, Uzbek language, Constitution and other cultural-cultural sources that convey feelings and qualities appropriate to this nation and this land. is reflected in educational activities. Since the issue of educating young people in the spirit of patriotism is one of the issues at the state level, it is appropriate to implement the tasks set out in clearly planned roadmaps for such goals.[4]On the topic of patriotism, many examples of creativity of our scholars and scholars have reached us. Amir Temur, Alisher Navoi, Muhammad Zahiriddin Babur, Mirzo Ulug'bek and other examples of creativity of our ancestors have occupied a special place even in our time, and are used as examples and examples in the education of young people. . Everyone interprets the concept of homeland in different ways, at their own level of understanding. This is the place where a person is born, where the blood of the navel is shed, [3] the place where childhood and youth are spent, where he gets education, where he travels and stays. Loving the motherland, serving for its development, protecting it from the evil eye and black forces, protecting its honor - all these are among the responsible tasks that you and we face. The concept of homeland, the feeling of loving, honoring and protecting it can be observed not only in humans, but also in the animal world. A fish tends to water, an animal to its nest, an insect nest. Those non-thinking creatures and insects recognize their home, build it, live in it with their partner, continue their offspring, and protect it when necessary. Therefore, this feeling should be highly developed in a person who is gifted with intelligence and thinking, who is the best of all beings in existence. In the rapidly developing period, the scope of work in our country is expanding day by day. With the efforts and initiatives of the head of our state, we are witnessing unprecedented levels of development in the life of our country. All the works and reforms that are being done in the way of people's peaceful living, protection of their interests, bringing our country

to the world arena, raising its reputation, [2]in the words of our President, "pleasing the people" as an important strategic issue in the development of our society is being considered. The content of the five priority directions of the Action Strategy for the further development of Uzbekistan includes meeting the material and spiritual needs of the people living in this country, improving their comfortable lifestyle, increasing the country's influence and reputation in the world community, and other issues. Self-sacrifice of people with a strong sense of patriotism plays an important role in the implementation of such great works. "Watan" is derived from the Arabic word, which means "motherland". Homeland means the place where the navel blood of a person was shed, the place where his descendants and ancestors were born, his social environment and the person, his life and spiritual concepts. "Patriotism" means loyalty to the Motherland, service to it, preservation of the country's peace, spiritual and moral qualities that encourage to be active for the development of the Motherland. Patriotism means loving the land inherited from our ancestors, preserving and developing the country's past and future, folk traditions, songs, and values." Education of young people and development of their personality in all aspects is entrusted to all general education schools. These tasks are considered to be the main factor for the development of all abilities and creative aspirations of students. The explanation of advanced ideas, the changes that are happening in our time, as well as historical topics in a modern spirit is a rich source for educating boys and girls in ideological belief and spiritual worldview. Only then will a strong national educational system, which will have an emotional impact on the spirit of the young generation, educate courage, bravery and initiative in them.

The concept of patriotism is often used in relation to military activities. In one respect, this is true. However, if we apply this sentiment only to the military, we will be using a narrow sense of patriotism. It is appropriate to see patriotism in all activities.[1]

#### **Conclusion:**

The need to educate young people in the spirit of patriotism, to prepare them physically and spiritually for the defense of the Motherland is one of the urgent tasks of today. including the training of students and young people studying in higher education institutions in the spirit of military patriotism is now implemented through all systems of education and training.
