Abstract

This article will help you to speak English in various useful and easy ways gives information about the possibility and at the same time you will speak English independently through some exercises.

Keywords: independently, activities, way, experiences, easy way, film, music, discussion, conversation, role plays, watching and speaking.

INTRODUCTION

Communication in English is considered popular, there is a strong demand for this direction, and in this case students want to speak independently in quick and easy ways that is they want to find information understandable and clearly to use. With this, the teacher is also looking for a possible experience; they may want to study methodically and independently, the solution to all this can be shown through our article. In this regard, speaking through movies or music is also popular among the currently widely used directions. Through this topic you will get useful information and learn speaking easily way.

METHODS

Through this topic, we will share the results of testing the methods of improving children's speaking ability. During the teaching of improving speaking ability, the student should be taught in such an interesting and understandable way that the student should organize with interest. Currently, there is a strong demand for knowledge in our country, especially speaking foreign languages, and the most important thing is that the pedagogues who impart this knowledge should be perfectly educated. It is possible to teach a child to speak fluently through popular methods that are widely tested and used all over the world to improve the ability to speak English.

- These are methods
- Discussion
- Watch and speak
- Conversation

- Describing pictures
- Interviews
- Role plays

In these directions, you have the opportunity not only to speak, but also to hear and learn many new words at the same time.

RESULT

Based on my little experience following these directions firstly taking **Communication** as an example of these methods you should communicate with a native speaker as much as possible because it goes you will realize your main mistakes moreover you can use dialogues by giving certain texts to students during the lesson through conversation. With this also have another useful method for teaching speaking **watch and speak** from this you can use videos, cartoons and short films adapted for the student. During teaching this method after each certain minute, you can pause and ask the child to describe the meaning of this film or the qualities of the characters. Another one of the known and famous method for everyone is **discussion**. It is used not only by language learners and native speakers too. Because this direction is very beneficial for speaking. In this case, you either want to or try to talk more and in addition to these, through **interviews** during training, from this you can learn speaking faster also know how to speak without any teacher. Besides that you can make speaking understandable through role plays or picture imaginations. If you use **role plays** in this case you can play games during learning words and also with **picture imagination** you will increase your imagination speaking in English because speaking imaginal it is one of the important things in technique English speaking rules.

CONCLUSION

Through this topic, we will share the results of testing the methods of improving children's speaking ability. During the teaching of improving speaking ability, the student should be taught in such an interesting and understandable way that the student should organize with interest. Currently, there is a strong demand for knowledge in our country, especially speaking foreign languages, and the most important thing is that the pedagogues who impart this knowledge should be perfectly educated. It is possible to teach a child to speak fluently through popular methods that are widely tested and used all over the world to improve the ability to speak English.
